Allowable Subject Matter

1. Claims 1-5, 7-12 and 14-16 allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 9:

Amendments to the claims overcome the prior art rejections made in the previous action.

The prior art of record fails to disclose merging multiple delta CRL's spanning at least 3 generations of a CRL into a single merged delta CRL that merges all delta CRL's between the latest owned CRL of the recipient and the requested CRL of the recipient. After an updated search the closest art of record pertaining to multiple delta CRL's was Perlman, U.S. Patent No. 5,687,235 and Curry, U.S. Patent No. 6,128,740. Perlman discloses a delta CRL being divided if it becomes larger than a certain threshold and Curry teaches segmented CRL's which make up a single CRL when taken together. Perlman and Curry fail to teach multiple delta CRL's spanning at least 3 generations of CRL's being merged to form a single delta CRL.

Although delta CRL's are known in the art they are not usually merged into a single delta CRL to span from a recipient's latest owned CRL and the late requested CRL by recipient.

All other pending claims are dependent on allowable claims 1 and 9 and are allowable for that reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
